Midnight Black
JY-6230

Solid colors are non-directional finishes therefore, directional arrows do not need to be installed in the same direction. However, special precautions must be taken since slight variations in color and gloss still occur between different production batches. These variations, though within industry tolerances, may still be detectable by the human eye in certain light conditions.

VIVID SOLIDS*

▪ 20 Year Limited Finish Warranty ▪ AAMA 2605

Matching 0.040" Flat Sheet in Inventory

Signal Blue

JY-2570

Hazelnut Mica
JY-2575

New Age Dark Bronze Mica
JY-2580

**Please contact us for warranty details.*

Mica, Metallic, and Design Series Finishes are directional finishes - requiring special precautions during planning, purchasing, fabrication, and installation in order to minimize the chance of visual color differences due to color batch variation and metallic flop. It is highly recommended that all material for a single project be ordered at the same time. With these finishes, directional arrows on product protective film should always be installed in the same direction.

3 COAT METALLICS

▪ 30 Year Finish Warranty ▪ AAMA 2605

Matching 0.040" Flat Sheet in Inventory

CUSTOM COLORS

- Matching custom colors is part of our everyday business.
- To begin the process, send us either a physical color sample (preferred), a coating manufacturer paint code, or a color reference such as a Pantone number. Please also detail specified performance requirements.
  - *Subject to minimum order quantities, matching 0.040" flat sheet can be coated at the same time as coil for MCM or Plate.*
  - *Achieving perfect color matches may not be possible every time due to inherent differences in substrate types, paint systems, pigments, and application methods.*
  - *For more information, please contact us for specific details.*

Metal Wall Panels / Curtain Wall

JY-2510

ARCHITECTURAL PAINT FINISHES

- AAMA 2605 performance standard compliant.
- Coil coated for consistency and quality.
- 70% Kynar 500® / Hylar 5000® PVDF resin system for Solid, Mica, Metallic, Metal Series, and Wood Series finishes.
- PVDF, FEVE (Fluoroethylene Vinyl Ether) and HDP (Highly Durable Polyester) resin paint systems for Vivid Solid finishes.

PRODUCT LINE COMPATIBILITY

- All standard paint finishes stocked in both 4mm FR MCM and 0.040" Matching Flat Sheet.
- 3mm Plate: 6 stocked finishes from the same standard color offering.
- *Alfrex Plate stocking finishes are reformulated versions of their MCM counterparts specifically modified for coil coating 3mm thick solid aluminum. As such, slight differences in color tone or light reflectivity may be noticeable by the naked eye when making side-by-side comparisons. Proper planning and precautions should be taken not to mix MCM and Plate of the same color on the same visual plane.*
